

## ECS Equipment/tank construction

ECS van Vught b.v. is an all-round mechanical engineering factory, capable of designing, drawing, manufacturing and assembling equipment and tanks in many types and sizes. We have a fully-equipped steel processing hall and a separate stainless steel and aluminium hall. We are fully conversant with the PED stipulations and on request, will work subject to external inspection. Overhaul and/or alterations to existing silos are also carried out. Look into our capabilities, in response to your request!
